The world’s leading automotive engineered polyolefins forum is coming to Shanghai!

The Society of Plastics Engineers - Detroit Section is bringing its successful, long-running conference to Shanghai to encourage professional development and networking opportunities around the world.

Network with OEMs and tier integrators while learning about advances in polyolefin materials, processes, and applications technologies as well as a growing range of thermoplastic elastomers (TPEs) and thermoplastic vulcanizates (TPVs). Engineering professionals who are leaders in their field will share technical presentations and keynote presentations that highlight advances in technology and application of materials that are essential to the design, engineering, and manufacturing in China and around the world.

The 2016 Shanghai TPO Conference is unlike no other in terms of the networking, learning, and exhibiting opportunities available for automotive engineered polyolefins professionals. Secure your sponsorship and exhibit space or submit your latest research by signing up today!
